

HEATY COMPLETE PROFESSIONAL SERIES

Fully automatic filling and refilling station with cloud and IoT connection - **The smart revolution of water replenishment**

Including

- Refill cartridge with 0.8 l Vadion pH-Control
- Filling combination BA 1/2"
- Digital water meter
- Digital capacitance measurement
- Keyless venting
- Key for cartridge and union nut
- Mounting material
- Connection fittings 3/4" ÜWM x 1/2" AG
- System separator BA
- Shut-off valves
- Integrated flow limiter
- Screen seal against resin ingress
- Optional: Water supply from above
- Integrated data interface via mobile network
- Leak protection

Technical data

Art.-No. 100392
Art.-No. 100392-OFK

Heaty Complete PROfessional + OFK

Connection thread	3/4" AG for ÜWM flat sealing
Max. operating temperature	40 °C
Max. filling capacity*	65 l/h
Max. operating pressure	6 bar
Capacity at 420 µS/cm**	122,5 l
Pressure reducer	adjustable
Electrical connection	230 V/50 Hz
Built-in length	340 mm Flat sealing to flat sealing with filling combination and shut-off valve

The user-friendly menu navigation reduces the potential for errors to a minimum, while the integrated leak protection warns of water damage. The documentation in the UWS Master Cloud protects against claims for recourse by recording every work step and every replenishment. Proactive communication minimizes unnecessary service calls through targeted trips. The connection to the cloud enables a comprehensive overview of all refills and customers. Status updates on cartridge changes, software updates and device history are available at any time. Early error detection and easy correction are guaranteed. Welcome to the future of fully automatic water refills.

The **Heaty Complete PROfessional OFK** series does not have a system separator.

Your benefits

- ✓ Automatic connection via the mobile data network, no setup required
- ✓ Continuous monitoring with proactive alerts
- ✓ 5-year Complete PROfessional package including 2 refill cartridges and cloud connection
- ✓ Safety: Documentation of the amount of treated and untreated water via integrated water meter
- ✓ Plannable service calls thanks to proactive communication
- ✓ Controlled refilling for sustainable heating water quality
- ✓ Leakage protection with push notification
- ✓ Alarm message when capacity falls below
- ✓ Digital capacity displays (resin and battery)
- ✓ Short installation length of only 34 cm

* Dependent on system and network pressure.

** The capacity specifications are based on the ideal case (12°dH / 21°FH). Deviations may occur due to application errors, water quality and temperature.

HEATY COMPLETE PROFESSIONAL SERIES

Fully automatic filling and refilling station with cloud and IoT connection - **The smart revolution of water replenishment**

Including

- Refill cartridge with 1.5 l Vadion pH-Control
- Filling combination BA 1/2"
- Digital water meter
- Digital capacitance measurement
- Keyless venting
- Key for cartridge and union nut
- Mounting material
- Connection fittings 3/4" ÜWM x 1/2" AG
- System separator BA
- Shut-off valves
- Integrated flow limiter
- Screen seal against resin ingress
- Optional: Water supply from above
- Integrated data interface via mobile network
- Leak protection
